THE CROSSING

PROGRESSIVE RAIL NEWS AND VIEWS

Volume 8 Issue 2

Everything in nature has a purpose, as all of the plant and animal species are connected into a much grander story of just how well Mother Nature provides all of life's nutritional essentials... such as oyster shells!

Who would have thought that once the oyster is shucked, the shell becomes an excellent feed ingredient for the poultry industry! Oyster shells are extraordinarily high in calcium, which in turn is one of the nutritional building blocks necessary to improve the quality of the egg shells by making them stronger, along with enhancing the overall health of the hen itself, making something as simple as oyster shells an incredible value!

Providing incredible value is what **Warehouse Shell Sales Company** is all about. Gary Lund and his crew know the feed industry well and are without a doubt The Midwest's premier supplier of oyster shells to an ever growing list of satisfied customers that see firsthand at their feed lot operations just how great a job Mother Nature does in fact do in providing all of the nutritional essentials that raise everyone's quality of life!

To learn more about oyster shells and all the benefits this phenomenal feed ingredient offers, be sure to contact Gary Lund at (651) 459-7294 or visit their website at www.warehousesellsales.com
