PROGRESSIVE RAIL
INCORPORATED

Recycling makes sense for so many reasons, as each and every one of us benefit from recycling today and our future generations will benefit even more so tomorrow. Recognizing the importance of recycling it is only natural to see innovative companies like **Vortex Recycling** and **OSI Environmental** take the entire recycling platform to new levels of convenience and innovation with of all things...oil filters!

What could be more convenient than having the on site totes standing by to collect your company's oil filters, then like precision clockwork the totes are scheduled for pick up and at the same time replenishment of more empty totes will keep your business running like, do we dare say, a well-oiled machine!

If your company generates oil filters, you owe it to yourself to call Cory Nelson at **OSI Environmental** (800) 628.7657. In conjunction with **Vortex Recycling**, an oil filter recycling program can be custom-designed around the unique demands of your own business. Programs like these make it easy for you to further the ecological stewardship responsibilities every good corporate citizen would only want to embrace, as you will be helping to protect our natural resources for future generations!

Best of all, **OSI Environmental** and **Vortex Recycling** will totally eliminate your environmental liability exposure with full removal of the waste. Your company can be assured that it will have no environmental impact from your used oil filters; no leachate problems from landfill disposal and no superfund liabilities.
